

# MONTANA SPRING WATER

## PERFECTLY BUBBLY

Our water for Bubbles comes from a vast aquifer in the Big Snowy Mountains of Montana. It contains naturally occurring minerals—which means it tastes crisp and delicious, and it's great for your body. The minerals are also the reason our bubbles are micro, which makes them so delightfully drinkable.

A resealable aluminum bottle keeps those bubbles inside. And aluminum can be recycled over and over and over, which is why 75% of all aluminum ever produced is still in circulation.
